

EPRA

This new type of reinforcement not only meets protection and resistance requirements but also provides comfort.

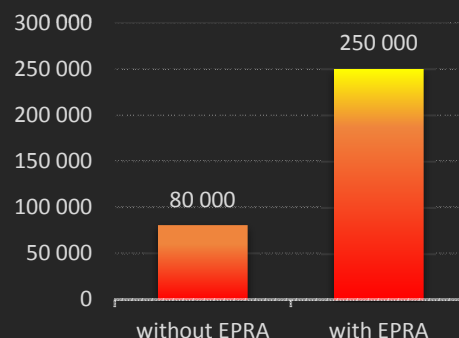

The EPRA finish can be applied to any kind of fabric.

- **HIGH RESISTANCE TO ABRASION** : beyond 250 000 cycles (EN ISO 1247-2 12 kPa)
- **RESISTANCE TO HEAT & FLAME** : FR properties are maintained
- **SOFTNESS** : Significant improvement of comfort in comparison to silicone coating
- **BREATHABILITY AND LIGHTNESS** : great advantages compared to classic coating reinforcements
- **LOOK** : innovative and technical

High abrasion resistance coating

This innovative finish reinforces any FR fabrics while keeping them flexible and breathable

ISO 12947-2 Abrasion (12kPa)

Example :
Twill 2/1
98% Aramid
2% Antistatic Fibers - 225g/m²
